Coordinating with other drug coverage (cont.)

Note: G.E.H.A secondary and tertiary member responsibility could be higher than G.E.H.A's primary copay/coinsurance, depending upon the primary plan's allowable and the primary payment.

Should Medicare rules change on prescription drug coverage, we reserve the right to require you to use your Medicare coverage as the primary insurance for these drugs.

For Medicare Part B insurance coverage: If Medicare Part B is primary, discuss with the retail pharmacy and/or CVS Caremark the options to submit Medicare covered medications and supplies to allow Medicare to pay as the primary carrier. Prescriptions typically covered by Medicare Part B include diabetes supplies (test strips, meters), specific medications used to aid tissue acceptance from organ transplants, certain oral medications used to treat cancer, and ostomy supplies.

Retail - When using a retail pharmacy for eligible Medicare Part B medication or supplies, present the Medicare ID card. Request the retail pharmacy bill Medicare as primary. Most independent pharmacies and national chains are Medicare providers. To locate a retail pharmacy that is a Medicare Part B participating provider, visit the Medicare website at www.medicare.gov/supplier/home.asp or call Medicare Customer Service at 800-633-4227.

Mail Order – Elevate Plus Option members also have the opportunity to receive Medicare Part B-eligible medications by mail. The CVS Caremark Mail Service Pharmacy will review the prescriptions to determine whether it could be eligible for Medicare Part B coverage and submit to Medicare if appropriate.

Note: The CVS Caremark Mail Service Pharmacy is not a Medicare Part B provider for diabetic supplies. You must use a retail pharmacy willing to bill Medicare as primary.

For Medicare Part D insurance coverage: G.E.H.A supplements the coverage you get with your Medicare Part D prescription drug plan. Your Medicare drug plan provides your primary prescription drug benefit. G.E.H.A provides your secondary prescription drug benefit. To ensure that you maximize your benefits, use a pharmacy in network for both the G.E.H.A Plan and your Medicare Part D plan, and provide both the plan ID cards when filling a prescription allowing the pharmacy to coordinate coverage on your behalf.

Patient Safety

G.E.H.A has several programs to promote patient safety. Through these programs, we work to ensure safe and appropriate quantities of medication are being dispensed. The result is improved care and safety for our members. Patient safety programs include:

- Preauthorization - Approval must be obtained for certain prescription drugs and supplies before providing benefits for them.
- Quantity allowances - Specific allowances are in place for certain medications, based on manufacturer and FDA recommended guidelines.
- Pharmacy utilization - G.E.H.A reserves the right to maximize your quality of care as it relates to the utilization of pharmacies.

G.E.H.A will participate in other approved managed care programs, as deemed necessary, to ensure patient safety.

How to use participating network retail pharmacies

You must fill your prescription at a participating network retail pharmacy. To locate participating pharmacies, call CVS Caremark at 844-443-4279 or visit geha.com/Prescriptions-Summary. To receive maximum savings, you must present your plan ID card at the time of each purchase, and your enrollment information must be current and correct. In most cases, you simply present the plan ID card together with the prescription to the pharmacist.

Claims (electronic or paper) processed through a non-network pharmacy will not be paid unless they are filled outside of the United States or United States territories.
