Post-service claims	Any claims that are not pre-service claims. In other words, post-service claims are those claims where treatment has been performed and the claims have been sent to us in order to apply for benefits.
Pre-service claims	Those claims (1) that require precertification or preauthorization, and (2) where failure to obtain precertification or preauthorization results in a reduction of benefits.
Preauthorization	A decision made by your health plan that a healthcare service, treatment plan, drug, surgery, or durable medical equipment is medically necessary after review of medical information. Sometimes called prior approval.
Precertification	The process of collecting information and obtaining authorization from the health plan prior to an inpatient admission or other selected ambulatory procedures and services.
Premium contribution to HSA/HRA	The portion of your monthly health plan premium that is credited toward our annual HSA deposit to your HSA based on your effective date of enrollment; or the portion of your health plan premium credited to your HRA which is available to you upon your enrollment in this Plan.
Primary care provider	Physician that focuses on a range of prevention, wellness, and treatment for common illnesses. Primary care providers include doctors, nurses, nurse practitioners, and physician assistants who are practicing within the scope of their license and are credentialed and designated by the Plan to be primary care provider. They often maintain long-term relationships with patients and treat a range of health-related issues. Doctors listed in provider directories or advertisements under any other medical specialty or sub-specialty area (such as internal medicine doctors also listed under cardiology, or pediatric sub-specialties such as pediatric allergy) are considered specialists, not primary care providers. Chiropractors, eye doctors, dentists and audiologists, are not considered primary care providers.
Rehabilitative	Therapy is initiated to restore bodily function when there has been a total or partial loss of bodily function due to illness, surgery, or injury.
Reimbursement	A carrier's pursuit of a recovery if a covered individual has suffered an illness or injury and has received, in connection with that illness or injury, a payment from any party that may be liable, any applicable insurance policy, or a workers' compensation program or insurance policy, and the terms of the carrier's health benefits plan require the covered individual, as a result of such payment, to reimburse the carrier out of the payment to the extent of the benefits initially paid or provided. The right of reimbursement is cumulative with and not exclusive of the right of subrogation.
Sound natural tooth	A sound natural tooth is a whole or properly restored tooth that has no condition that would weaken the tooth or predispose it to injury prior to the accident, such as decay, periodontal disease, or other impairments. For purposes of the Plan, damage to a restoration, such as a prosthetic crown or prosthetic dental appliance (i.e., bridgework), would not be covered as there is no injury to the natural tooth structure.
Specialty medication	Specialty medications are biotech or biological drugs that are oral, injectable or infused, or may require special handling. To maximize patient safety, all specialty medications require preauthorization. These drugs are used in the treatment of complex, chronic medical conditions such as hemophilia, multiple sclerosis, hepatitis, cancer, rheumatoid arthritis, pulmonary hypertension, osteoarthritis, and immune deficiency.
Speech generating devices	Electronic voice output communication aids, which are electronic augmentative and alternative communication systems used to supplement or replace speech or writing for individuals with severe speech impairments.
