Health savings account (HSA)	A tax-free account with monthly contributions made by us which earn interest for you to accumulate funds to help cover the deductible and other medical out-of-pocket expenses that roll over from year to year when not used for medical expenses. You have the option to make additional contributions to your account up to the maximum allowed by law.
Iatrogenic infertility	An impairment of fertility by surgery, radiation, chemotherapy, or other medical treatment affecting reproductive organs including gonadotoxic therapies, or ovary or testicle removal for treatment of disease.
In vitro fertilization	In vitro fertilization (IVF) is a method of assisted reproduction that involves combining an egg with sperm in a laboratory dish. If the egg fertilizes and begins cell division, the resulting embryo may be transferred into the uterus where it may implant in the uterine lining and further develop, or be cryopreserved for later transfer. A cycle of IVF is defined as stimulation of ovaries, oocyte retrieval, and embryo transfer or preservation.
Infertility	Infertility is defined as the inability to conceive pregnancy within a 12-month period for individuals under age 35 (6 months for persons aged 35 or older) through unprotected intercourse or artificial insemination. Infertility may also be established through evidence of medical history and diagnostic testing. Infertility includes the need for medical intervention to conceive pregnancy either as an individual or with a partner, except following voluntary sterilization.
Inpatient care	Inpatient care is care rendered to a person who has been admitted to a hospital for bed occupancy for purposes of receiving inpatient hospital services. Generally, a patient is considered an inpatient if formally admitted as an inpatient with the expectation that he or she will remain at least overnight and occupy a bed even if it later develops that the patient can be safely discharged or transferred to another hospital and not actually use a hospital bed overnight. See Section 3, *How You Get Care*, *Covered facilities,* for the definition of an Acute Inpatient and Residential Treatment Center.
Long-term acute care	Often referred to as LTCH or LTAC, these facilities provide services for patients who need extended intensive or critical, hospital-level of care beyond that of the traditional short hospital stay. LTCH's specialize in treating patients who have more than one serious condition yet have the potential to improve with time and care and return to their previous health status. Generally, services are focused on respiratory therapy, head trauma treatment, and pain management.
Long-term care	We do not provide benefits for long-term care, regardless of who recommends the care or where it is provided. The Carrier or its delegated medical professionals determine which services are long- term care. A range of services and support provided to meet personal care needs on a long-term basis. While some medical care may be necessary, most of the care provided is not and does not require a licensed caregiver. This encompasses a spectrum of services provided in a variety of settings for people who do not have full independence because of a medical condition, injury, or chronic and/or behavioral illness. Long-term care is often used to provide custodial care as well as instrumental activities of daily living necessary for safety and health. Long-term care is usually custodial care that has lasted for 90 days or more yet can begin prior to 90 days dependent on the member's response to professional intervention. **Long-term care and long-term acute care are not one and the same. See the definition of long-term acute care for more information about those services.**
Medical emergency	A medical emergency is the sudden and unexpected onset of a condition or an injury that you believe endangers your life or could result in serious injury or disability and requires immediate medical, surgical, or behavioral health care (includes mental health and substance use disorders).
