cryopreserved for later transfer. A cycle of IVF is defined as stimulation of ovaries, oocyte retrieval, and embryo transfer or preservation.

Artificial Insemination is a surgical procedure for the introduction of sperm or semen into the vagina, cervix, or uterus to produce pregnancy.

Assisted reproductive technology (ART) includes all fertility treatments in which either eggs or embryos are handled. In general, ART procedures involve surgically removing eggs from the ovaries, combining them with sperm in the laboratory, and returning them to the birthing person's body or donating them to another person. They do NOT include treatments in which only sperm are handled (i.e., intrauterine - or artificial - insemination) or procedures in which a birthing person takes medicine only to stimulate egg production without the intention of having eggs retrieved.

Benefit Application

This medical policy relates only to the services or supplies described herein. Please refer to the Member's Benefit Plan for availability of coverage.

Infertility

Diagnosis and treatment of infertility is covered and is specific to procedures listed below except as shown in the Not covered section below.

- Artificial insemination is a surgical procedure for the introduction of sperm or semen into the vagina, cervix, or uterus to produce pregnancy. Artificial insemination procedures and related services and supplies may be covered when medically necessary, including:
  - Intravaginal insemination (IVI), except if performed outside of clinical setting
  - Intracervical insemination (ICI)
  - Intrauterine insemination (IUI)
- Fertility drugs

Iatrogenic Infertility

- Standard fertility preservation procedures (retrieval of and freezing of eggs or sperm) for members who have been diagnosed with iatrogenic infertility include:
  - the collection of sperm
  - cryopreservation of sperm
  - cryopreservation of embryo
  - collection of oocyte
  - cryopreservation of oocyte
  - benefits limited to up to 12 months of storage of sperm, oocytes and embryo
