Note: High Option plans include standard fertility preservation procedures as well as Assisted Reproductive Technologies and In Vitro Therapy for Iatrogenic Infertility when qualifying criteria are met.

In Vitro Fertilization (IVF) (High Option)

- Oocyte identification and retrieval
- Sperm preparation
- Insemination of oocytes
- Embryo culture
- Embryo biopsy and preimplantation genetic testing when determined to be medically necessary
- Intrauterine embryo transfer
- Cryopreservation of sperm and ova (gametes) and embryos for future transfer
- Storage of cryopreserved gametes and embryos for 1 year
- Fertility drugs

In Vitro Fertilization is limited to $25,000 annual benefit maximum. Dollar limits include procedures, supplies, and any related facility or anesthesia services. (High Option)

Policy Statement

G.E.H.A will provide coverage for infertility treatment when it is determined to be medically necessary because the medical criteria and guidelines as documented below have been demonstrated.

Diagnosing Infertility

The following are proven and medically necessary for diagnosing and treating infertility:

A. Antisperm antibodies
B. Antral follicle count
C. Genetic screening tests:
    1. Cystic fibrosis gene mutations
    2. Karyotyping for chromosomal abnormalities
    3. Y-chromosome microdeletion testing
D. Hormone level tests:
    1. Anti-mullerian hormone (AMH)
    2. Estradiol
    3. Follicle stimulating hormone (FSH)
    4. Luteinizing hormone (LH)
    5. Progesterone
    6. Prolactin
