K. Sperm capacitation test
L. Sperm DNA integrity/fragmentation tests
M. Sperm penetration assays
N. Uterine/endometrial receptivity testing
O. Treatments to improve uterine/endometrial receptivity.

Iatrogenic Infertility

Benefits are available for fertility preservation for medical reasons that cause irreversible infertility. Services include the following procedures, when provided by or under the care or supervision of a Physician:

A. Collection of sperm
B. Cryopreservation of sperm
C. Ovarian stimulation, retrieval of eggs and fertilization
D. Oocyte cryopreservation
E. Embryo cryopreservation

Benefits for medications related to the treatment of fertility preservation are considered under the Outpatient Prescription Drug benefit or under the Pharmaceutical Products. Check the member specific benefit plan document for inclusion or exclusion. For medication-related benefit questions, please contact G.E.H.A at (800) 821-6136. Authorization of fertility medication does not imply authorization of any related fertility procedures.

Benefits are limited to one successful cycle of fertility preservation for Iatrogenic Infertility per covered person during the entire period of time enrolled for coverage under the healthcare plan.

Successful fertility preservation cycle includes:

1. 8-10 mature oocytes obtained within no more than 3 attempts of retrieval or
2. 3-4 vials of sperm obtained within no more than 3 attempts of separate sperm extraction sessions. (ASRM, 2019)

When treatment for Iatrogenic Infertility is not covered:

A. Cryopreservation of immature oocytes, ovarian tissue or testicular tissue
B. Embryo transfer (unless under the High Option Plan)
C. Long term storage costs (greater than 1 year)
D. Infertility treatment after voluntary sterilization (excluding gender affirmation)

Required Documentation

Medical notes documenting the following, when applicable:
