National Transplant Program (NTP) Note: We cover related medical and hospital expenses of the donor when we cover the recipient. We cover donor testing for the actual solid organ donor or up to four bone marrow/stem cell transplant donors in addition to the testing of family members. Notes: • If you are a participant in a clinical trial, please see Section 9, *Clinical Trials*, for coverage details. • The process for preauthorizing transplants is more extensive than the normal process. Before your initial evaluation as a potential candidate for a transplant procedure, you or your doctor must contact G.E.H.A's Medical Management Department so we can arrange to review the clinical results of the evaluation and determine if the proposed procedure meets our definition of "medically necessary" and is on the list of covered transplants. Coverage for the transplant must be authorized in advance, in writing. • The transplant must be performed at a Plan-designated transplant facility to receive maximum benefits. G.E.H.A uses a defined transplant network, which may be different than the Preferred Provider Network.	Services are paid at the regular Plan benefits.	Services are paid at the regular Plan benefits.
