Policy type: Medical Necessity.

Line of Business: All G.E.H.A Medical Plans.

Authorizations are issued for 6 (six) months, unless the ordering physician requests a different timespan, or the patients' unique circumstance or condition supports the medical necessity for a different authorization timeframe. Reauthorization requests are reviewed for efficacy, safety, and tolerability.

Maximum total length of initial therapy with PD-1/PD-L1 Inhibitor for metastatic non-small cell lung cancer is 2 years^{1,2}.

Universal Approval Criteria:

Unless otherwise noted, the review criteria used by OncoHealth to determine medical necessity for anticancer treatments and supportive agents include, but is not limited to:

National Comprehensive Cancer Network (NCCN) - use consistent with NCCN recommendations carrying a Category 1 or 2A level of evidence; OR

United States Food and Drug Administration (FDA) labeling - new drugs or regimens (combinations of drugs) consistent with the product labeling; OR.

Indications not included in the official FDA labeling or recommended by NCCN (Category 1 or 2A level of evidence) may be considered if determined to be medically necessary per one or more of the following compendia:

O Clinical Pharmacology (Strong For); OR

O Wolters Kluwer Lexi-Drugs® (Level A); OR

Other uses of drugs and biologics may be considered medically necessary if supported as safe and effective according to peer-reviewed articles from one of the following journals:

O American Journal of Medicine; Annals of Internal Medicine; Annals of Oncology; Annals of Surgical Oncology; Biology of Blood and Marrow Transplantation; Blood; Bone Marrow
